GENERAL TERMS AND CONDITIONS OF SALE

Price list 2016 valid from April 2016

This price-list and the terms and conditions of sale replace all previous ones.

These general terms and conditions of sale apply to the purchase and sale between Scab Giardino SpA (hereinafter Scab) and the Purchasing subject (hereinafter the Purchaser), together with the special terms and conditions shown in each order confirmation. These general terms and conditions of sale prevail, in the case of disagreement, over any others that may be shown in the order and on any other attached document, save specific approval by Scab.

The transmission of the order, even if verbal or not signed by the Purchaser, and the acceptance of goods, represent full and tacit acceptance of the general terms and conditions of sale.

1. The contract of sale of the products shall be considered concluded only in the case of acceptance by Scab expressed in writing or tacitly, when Scab starts the execution of the contract.

2. PRODUCT CHARACTERISTICS

The technical data and the photographs in this document are indicative. Scab reserves the right to eliminate or modify at any time articles, patterns, packaging, lines and characteristics of the product, without prior notice, including during the period when this price list is in force.

PRICES AND PAYMENT

3. The prices are agreed as exclusive of VAT.
4. Scab reserves the right to modify the price-list and any offers at any time and without any notice being required.
5. For special orders, Scab reserves the right to ask for special terms and conditions of sale and payment on order confirmation. Any request for special packaging is subject to approval by Scab and to price increase to be agreed. The number of pieces in the parcel, shown alongside each model in the price list, is compulsory. The Purchaser therefore specifically accepts that orders, when made for an odd number of a packaged product in an even quantity, are automatically adapted to the quantity or the immediately following even multiple.
6. The price must be paid at the domicile of Scab.
7. In the event of late payments, Scab will have the faculty of asking for default interest according to the law, including pursuant to art. 5 of Legislative Decree 231/2002, without prejudice to the other rights under the Civil Code for the seller.
8. Non-payment or late payment of all or of a part of the price by the date agreed will entail the loss of the acceleration clause by the Purchaser, pursuant to article 1186 of the Civil Code, including with reference to other orders/purchases by the same Purchaser.
9. Pursuant to and for the purposes of article 1462 of the Civil Code, the Purchaser may not make any objections in order to avoid or retard payment of the price.
10. Scab has the right to suspend delivery of the goods in any case of non-fulfilment, including partial, by the Purchaser, without this causing any claim for compensation by the Purchaser. Scab, in the event of non-fulfilment, including partial, by the Purchaser, reserves the right to modify, at any time, the conditions of sale agreed.
11. Scab is relieved of any responsibility due to the absence and/or wrong notification of data by the Purchaser.

SHIPMENT AND TRANSPORT

12. The delivery dates are merely indicative and do not guarantee that the estimated delivery dates will be respected in full. Scab is in any case relieved of all responsibility in the event of the impossibility of making the supply within the estimated times, or in the event of late delivery due to fortuitous events or force majeure.
13. The goods are sold Ex-Works.
14. The goods travel at the risk of the Purchaser, including in the case of goods sent carriage free.

COMPLAINTS

15. The goods must be checked by the Purchaser on delivery. Any complaints relative to the packaging, the quantity, number, external characteristics of the product or other defects must be recorded on delivery of the goods and reported to Scab in a letter sent by recorded delivery with advice of receipt within 8 days of receipt of the goods; photographs must be produced with the report proving the defects claimed. Any claims relative to complaints that cannot be identified by diligent control on receipt must be reported to Scab in a letter sent by recorded delivery with advice of receipt within 8 days of being discovered and in any case not later than 12 months from delivery date.
It is up to the Purchaser to check that the products are intact before transferring them to third parties; following the transfer, no complaint can be made to Scab. Any responsibility of Scab for defects or manufacturing defects is limited to the price of the product with the exclusion of transport costs and any further losses.
The guarantee is not operative in the event of defects caused to the product by incorrect assembly, by improper use or if it is not used for its normal purpose, by non-observance of the instructions for use or maintenance or by ordinary wear and tear.

RETURNS

16. Returns of goods are not allowed, except with the written consent of Scab; in no case are accepted returns of goods that are not defective or that have been used, manipulated or altered by the Purchaser. The state of repair of the goods will be carefully checked by Scab on return and, in the event of damage that cannot be attributed to Scab, the value of the individual pieces will not be acknowledged.
The costs for the return of the goods and for the shipment of the products sent to replace the defective goods are at the expense of the Purchaser.

JURISDICTION

17. For any dispute relative to the interpretation and execution of the sale, Italian law will be exclusively applicable and the judicial authorities of the Court of Brescia are exclusively competent, including when the payment is agreed by draft or bill domiciled at Purchaser.
18. Nobody is authorized to represent Scab in court without the relevant proxy.

IMPORTANT:

Scab products are protected by patents, which protect the uniqueness and originality of the technologies, shapes, models, patterns and designs of our production.

All our products are made in Italy in one of the 3 Scab plants and are the subject of stringent production and quality control.

made in Italy

Scab - ReCycle

The qualities of responsibility and environmental sustainability in industrial production are a green hope for the future of all of us. Contributing to the process of recycling materials and a production method that respects the environment and keeps it clean is also possible in the production and moulding of technopolymers.

Scab Design products are perfectly recyclable as the individual components that form them can be rapidly sorted. Each individual plastic element bears an identification mark according to standard ISO 11469:2001, to allow correct identification and provide easy directions for recycling.

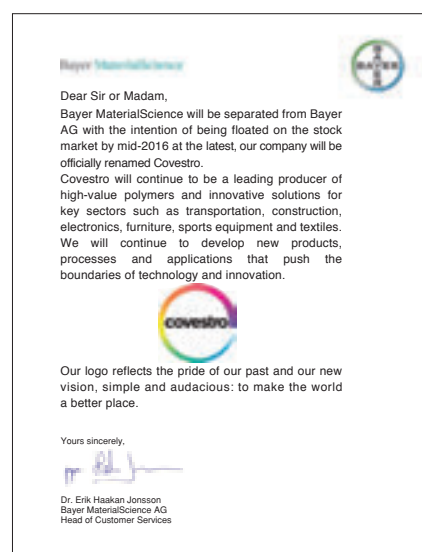

The whole Scab production range is made 100% from completely recyclable materials.

The innovative, exclusive and highly complex moulding technology makes all Wave chairs a very original and exclusive model.

This technology is really unique. Any small imperfection that might be present, any colour variation, are typical features of the product, that cannot be avoided and that confirm the product is a unique piece.

The whole polycarbonate SCAB production range is made with Makrolon® by Covestro formerly Bayer MaterialScience

Guidelines for creating the product reference number.

Please specify all component reference numbers of the product as per following order:

· 1 Model reference number · 2 Frame finishing · 3 Fabric monogram (letters) or main body colour (according to the selected model) · 4 Fabric reference number

The number of pieces in the parcel is shown in the price list next to each model.

Any order made for different quantities will be automatically modified adapting the quantity to the immediately following multiple.
