BROKIS

Description

Features

The Capsula model is a brilliant pendant light design composed of two convex capsules, one overlapping the other and fusing into a singular form. The design resembles cells or plant seeds and evokes the metaphor of light as the source of life. The combination of a crystal-clear glass outer shell and an internal capsule of colored glass gives rise to an exciting 3D optical effect, while the tubular LED light source casts soft and gentle illumination throughout any interior.

Technology

The craftsmanship applied in production follows in the centuries-old tradition and experience of master glassmakers. The precision crafting of hand-blown glass instills distinctive, enduring character and outstanding quality in all Brokis products. The glass shades are formed from multiple layers of molten glass, each of which is scrutinized by the master glassmaker prior to being blown into the mold. Up to 70% of the resulting quality is achieved in this stage of production. No less attention to detail is paid in handcrafting the wooden elements of the light. Each piece is individually processed by the artisan in a series of strictly observed production stages. We take special care in selecting quality fine wood and ecologically friendly materials to treat it with.
