- 70 | **LIFE** | Designed for life
- 72 | **GAGA** | Designed to make you go gaga
- 74 | **TURTLE** | A shield from everyday stress
- 76 | **SHABBY** | Lounge delux
- 78 | **TABLES** | Timeout | Gaga | Funco | Gazell

#### HOW COMFORTABLE DO YOU WANT TO BE?

Your body and your style shouldn't have to adapt – we will do that instead. For many of our armchairs, you can choose between different types of wood, different legs and various heights. Upholstery – in fabric, leather or sheepskin – is offered in more than five hundred variants. It's your comfort zone, so you make the decisions.

A misty landscape with a line of trees reflected in a calm body of water. The trees are silhouetted against a soft, hazy sky, and their reflection is clearly visible in the still water below. The overall mood is serene and quiet.

# Products of a province.

4

No matter which road you take through the Swedish province of Småland, miles and miles of dense forest will be your constant companion. But every now and then the landscape opens up, and what you will see is likely a furniture factory.

In the old days, our part of the country demanded hard, laborious work. This would shape the people of Småland, who became sensible, honest and enduring – qualities that also became the framework of the furniture industry. Småland furniture did not say “Here I am,” but rather “I am here for you.”

The well-known Swedish Furniture District of today still rests on that original approach. It's a heritage we are very proud to be a part of.

# When we've finished our work, you're the one who gets to relax.

Every piece of furniture from Conform is designed to be the most comfortable spot in your home. The more work we put into it, the more you will enjoy it.

The story began more than forty years ago.

Then it was 1978, and we were making armchairs in Holsbybrunn, Småland.

Now it's 2021, and we are making armchairs in Holsbybrunn, Småland.

At first glance there is no difference – but take a closer look, and you will find a remarkable development when it comes to materials, design and manufacturing processes.

Sure, we could broaden our product portfolio quite easily – but we are perfectly happy with making armchairs and footstools. To us, specialization is valuable. It means the things you make are special.

# Your home, your furniture.

For every piece of furniture there is a context to fit into. It needs to find its place in time and space, in a timeless or contemporary home.

We have a long-standing collaboration with several Scandinavian designers – Jan, Niels, Jahn, Lenka, and Kenneth. Together, we create furniture that is surprising and pleasing, inviting and impressive.

The final design touch is yours to make, by choosing and combining sheepskins, leathers, fabrics and surfaces. Perhaps your armchair should match the rest of your home perfectly – or maybe you wish to have a piece of furniture that no one else has?

# Following the sitting curve.

Seeing and sitting are the first two words in the Conform dictionary. Each one of our armchairs should look so inviting that you just have to try it. And once

you've sat down, you should never want to get back up again.

Design, ergonomics and finish are closely linked – well, actually crucial for each other – when we develop new products.

Straight lines and flat surfaces are the simplest way to make furniture. Especially if you only use rectangular blocks, which are so easy to upholster and assemble.

That's not the Conform way.

All our armchairs have arched surfaces and moving lines with a natural direction, as

well as built-in technology to support your body in every position.

Understanding how a user's lower back changes and how a body's center of gravity shifts is essential in our product development. We call it the sitting curve, and we've been following it for decades. It has pushed our furniture to the international front lines of comfort.

When making an organically shaped armchair, with movable parts, you need the sensibility of an experienced craftsman. The upholstery must be stretched just right to avoid wrinkles and gaps, surfaces must meet each other with exact precision.

Because of that, manufacturing at Conform will never be fully automated. It takes human hands and eyes to furbish, upholster and assemble – people who recognize good craftsmanship. Just like you will.

# A few words about...

## ... leather.

We work primarily with three different grades of leather: standard, semi-aniline, and aniline leather. Their qualities differ – just like the preferences, taste and needs of our users.

**Our standard leather** is a corrected, cover-dyed and grained leather, where most of the natural irregularities are removed. It is very resistant to stains and dirt, and easy to keep clean.

**Semi-aniline leather** is soft and dyed with a light, slightly coloured coating. Some natural irregularities and marks may be present. It breathes well and offers good comfort.

**Aniline leather** is our finest and most natural-looking leather. It has a light coating and is coloured only with dye.

This very smooth leather gets beautifully patinated with age when properly treated. It requires some extra care since the surface is bare, but it gives your furniture a unique character with its natural hues and marks.

## ... sheepskin.

Our sheepskins come from some of the most respected sheep farmers in Australia. The skins are from Crossbred sheep only, guaranteeing a high quality. They

are naturally curly, and can vary in terms of curl and shade.

## ... colour samples.

Keep in mind that two different pieces of leather will not and should not look identical. Our samples are therefore only an indication. The skins and leathers are prepared and dyed according to high standards of environmental and animal care.

# Uncomfortable testing for a comfortable life.

Once an armchair is ready for manufacture, it has not only reached the design and technical perfection we strive for. It has also survived a stay in our torture chamber – sorry, our test lab.

In addition to good old durability tests with mechanical pressure against back, seat and foot, we've also set up our own devices in order to attack the armchair from every angle.

The armrests are exposed to a 60 kilo pressure, roughly 20.000 times. We then drop a bag of 120 kilos on the seat and test the folding mechanism in the backrest with a strong wire, pulling it backwards with a pressure of 40 kilos – about 100.000 times.

Every now and then we also pick an unsuspecting chair of the current assembly line to ensure that its quality does not drop with time.

A relaxing chair must be able to put up with some stress – actually, a lot of it – especially if it's from Conform.

# DRIVEN BY DESIGN.

16

Our close collaboration with external designers is crucial to our product development. It's when we turn their ideas and sketches into reality that we find new technical solutions, materials and combinations.

The Scandinavian look is naturally dearest to our hearts. With clean lines, true craftsmanship and durable constructions, you get furniture that ages with dignity.

However, at Conform we hold one shape above all other: the shape of your body. Regardless of style and function, every armchair needs to conform to that.

**Jahn Aamodt**  
Designer, Norway

“Design should satisfy the desires of the user, the company and the society. Design should have personality and character to long lasting use.”

**Jan Ekström**  
Designer, Sweden

“It has to be true vitality in the lines of the furniture. A naturally bold expression to make it become a favourite armchair each time!”

**Niels Gammelgaard**  
Designer, Denmark

“We are not interested in doing design for the facade. We want to explore the core of design. We don't want to do more of what already exists, but rather make more out of the existence of design. Finding the core benefit of design that will do your life good.”

**Kenneth Bergenblad**  
Designer, Sweden

“What makes a piece of furniture beautiful is the right balance between colours, shapes and materials. Combining pleasant design with exciting materials has always been my guiding light.”

**Lenka Teilmann**  
Designer, Denmark

“Design should be following timeless style showing handcrafted details. The design should be contemporary but also reaching a wide audience.”

# Your comfort zone now comes with a soundtrack.

With an integrated sound system as sophisticated as the chair itself, MyPlace brings you comfort on a whole new level. Designed in Sweden and unique to Conform, the listening experience is pristine and precise, whether your company is Shakira or Shakespeare, Bee Gees or Beethoven.

MyPlace is an enhanced comfort zone, where a pure listening experience blends with the Conform craftsmanship in complete harmony.

The sound system has been developed right alongside the armchair, from rough draft to fine-tuned perfection.

The Bluetooth® connected speakers provide an outstanding sound. Then the shape of the headrest not only directs the sound to your ears – it also isolates it from the surroundings. Take one or two steps back, and the sound can hardly be noticed. How can that be?

The simple explanation is that MyPlace is the result of a close collaboration between experts. Our furniture knowledge has been combined with the audio expertise of Orlo, one of Sweden's leading companies in their field.

Orlo's unique, compact platform delivers an astonishing sound while being highly adaptable for many different applications. Armchairs turned out to be one of the best examples – and we are proud to have the exclusive rights for this type of use.

Read more about MyPlace on page 30.

**THE CONFORM SOUND EFFECT**

The sound is experienced by the person sitting in the chair.

Småland. As bleak and dark as the winters are, as bright and magical the summers can be. Perhaps that contrast is what makes our furniture so lively and durable.

# Design your own Timeout.

Adjustable headrest

Upper and lower part of the backrest interoperate for optimum ergonomics

The angle of the footstool suits everyone regardless of length

Adjustable backrest with a simple grip you can alter the angle of the back

Always returns to its original position

Choose fabric, leather or sheepskin. Choose wood or upholstered base. Choose swivel foot or leg – and if you choose the aluminum foot, wood/aluminum foot you can even choose height. Choose your backrest height.

Jahn Aamodt, the designer of Timeout,

believes that “design should satisfy the desires of the user, the company and the society, and have a personality strong enough to last for decades of use.”

That notion is especially true for Timeout, the perfect relaxing chair that always returns to its original position when you leave it.

# The personality is created through freedom of choice.

The comfort through intelligent features.

## Base

- 1. Upholstered
- 2. Black Stain Oak
- 3. White Ash
- 4. Oak Laquered
- 5. Oak Untreated

- 4. Swivel foot White Aluminum
- 5. Swivel foot Wood/Aluminum
- 6. Swivel foot Aluminum
- 7. Swivel foot Wood
- 8. Swivel Quattro Aluminum

# Timeout.

## The armchair that conforms to your wishes.

24

This is not just any armchair – it's your armchair. With your choice of details and colours, you can show your personality and let your style take centre stage.

The combination of leathers and fabrics, on the armchair as well as on the footstool, allows for many individual choices. A discreet matching or

daring contrast? Nothing is ever wrong.

Timeout can be turned into anything from a faithful everyday servant to a colourful solitaire that makes your living room a show room.

Also keep in mind that a fine leather surface will age gracefully. It is made to be used, and it gets more beautiful with each passing year.

# Freedom of choice.

Choose between more than 500 fabrics, sheepskins and leathers.  
Choose between different types of wood. Choose between different legs.

Lounge deluxe by Lenka Teilmann

**Upholstery** Leather or fabric. **Legs** Chrome or black metal. You can choose model with or without armrest. **Stitching** In leather this model is only

available with cross stitching in contrast color or matching color of thread to the leather. In fabric it is only available with normal matching stitching.

# EXPAND YOUR COMFORT ZONE.

All right, we confess: We do not make armchairs exclusively. Inbetween our armchair development projects, we had a go at designing some side boards – and the results were so good that we simply couldn't help producing them. Of course, they are built on the same high standards as the rest of our range – and designed to expand your comfort zone.

## TIMEOUT table

Design by Jan Aamodt

Surface: veneer oak (lacquered, untreated or black stain), white ash or walnut. Leg: brushed zinccoated metal

The comfort zone.

We are constantly told to leave it.

Outside its borders is where it all happens, they say. That's where you perform at your best, that's where you grow as a human being.

But do you really need to do that – all the time?

No, not if you ask us.

We think you should stay in your comfort zone as long as you like. Relax, enjoy the moment – or just do nothing.

With a Scandinavian sense of design, solid craftsmanship and unique functionality, we create armchairs for all those moments when you take that well-deserved step back.

We make it harder than ever to leave your comfort zone.

Quality in every detail. Grace in every sense. Comfort for every body.
