## Identification

Name	<b>Whistle MEDIUM</b>
Type	suspension lamp
Collection	Whistle
Line	Exclusive Line
Designed by	Lucie Koldová

**BROKIS**

## Description

### Features

Suspension Whistle lamp constitutes a symbiosis of two different forms or their multiplication. As the external shape is following the ray of light, it symbolically portrays the shape of traditional whistles. This design follows a series of lamps made of transparent glass with a more technical appearance. Inserted spot lamp is highlighted by offset inks, outer form creates an impression of the shade of an internal soul of the pendant and further define the precise shape of elongated pipes. Hand-blown objects create a visual line of archetypal lights directing light downwards. Whistle lamp collection consists of three glass pipes of larger dimensions and showcases the mastery of the material and the Czech glassmakers.

### Technology

The craftsmanship applied in production follows in the centuries-old tradition and experience of master glassmakers. The precision crafting of hand-blown glass instills distinctive, enduring character and outstanding quality in all Brokis products. The glass shades are formed from multiple layers of molten glass, each of which is scrutinized by the master glassmaker prior to being blown into the mold. Up to 70% of the resulting quality is achieved in this stage of production. The metal reflector is manufactured through a unique metal stamping technique that has been proven over the course of millennia and involves spinning cold sheet metal on a rotating form. The history of this technology goes back to Celtic times. As with the glassmakers, the master metalworkers draw upon the tradition and experience that have been carefully passed down through the ages and give the final product exceptional added value.
