

Tite, suspension design Marc Sadler 2000

FOSCARINI

The collaboration between Foscarini and Marc Sadler began with Mite; a floor lamp so innovative that it was awarded the Compasso d'Oro in 2001. The company and the designer even developed a special patent for Mite: a mix of fibreglass and carbon thread that acts as both decoration and a supporting structure at the same time. Technology previously used to produce fishing rods, oars and golf clubs was introduced to the lighting world for the first time. The extreme flexibility of this material – which is light and resistant at the same time – has enabled the design of an entire

collection of lamps for various different uses. This is how Tite came to exist, a suspension lamp also seems to recall a section of the body of Mite in its shape, upset and suspended: a circular-section shape that broaden downwards. The light bulb is close to the lower bottom, source enlighten evenly the diffuser, giving prominence to the decoration and projecting downward an intense and warm light. This versatility makes these suspensions ideal for any setting, whether domestic or contract, furnishing it with the stylish character that distinguishes the entire collection.

Tite, suspension technical info

FOSCARINI

Description

Suspension lamp with diffused and direct light. Diffuser achieved using an artisanal process that entails the application of version a carbon thread for the black version onto a glass fabric. In version 1 nickel-plated diffuser mount and spring to secure the light bulb in the middle of the diffuser. Ceiling rose with galvanised metal bracket and nickel coated metal cover. Canopy decentralization kit - multiple canopy available (up to 9 suspension lamps).

Materials Fiberglass fabric with carbonium thread and nickel-plated steel

Colors black

Brightness light

semi-diffused and direct down light

Tite, suspension multiple composition

FOSCARINI

Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case. The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.
