100% natürlich. Diese innovative Materialentwicklung besteht aus rein biozirkulärem Kunststoff und Holzfasern.

Der zirkuläre Kunststoff wird ausschließlich aus benutztem Sonnenblumen- und Rapsöl (1.) aus Industrie und Gastronomie (2.) gewonnen. Die Öle werden gesammelt und in einem speziellen Recyclingverfahren in Kunststoff umgewandelt (3.). Diese Stoffe erfahren so erstmals eine sinnvolle Weiterverwendung, bislang konnten sie nur thermisch verwertet werden. Zudem werden keine zusätzlichen Ackerflächen benötigt.

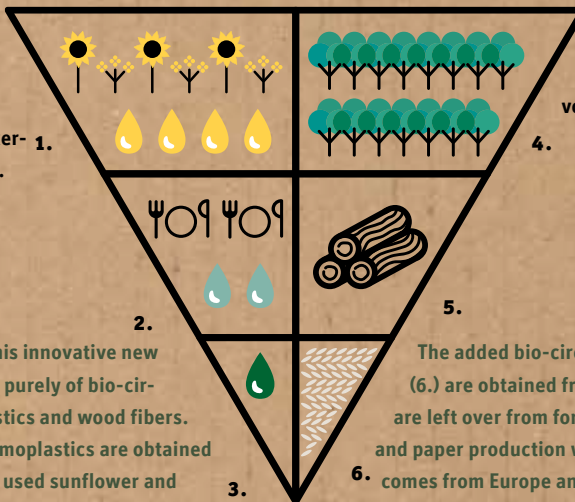

100% natural. This innovative new material is made purely of bio-circular thermoplastics and wood fibers. The circular thermoplastics are obtained exclusively from used sunflower and rapeseed oil (1.) from industry and gastronomy (2.). The oils are collected and converted in a special recycling process (3.). This is the first time that these materials have been put sensibly to further use; previously, they could only be thermally recycled. Moreover, no additional "new" resources are required.

Die zugesetzten biozirkulären Holzfasern (6.) werden aus Bäumen (4.) gewonnen, die bei der Forstpflge anfallen sowie aus Resten der Papierherstellung. Alle Hölzer (5.) stammen aus europäischem Anbau und sind FSC®-zertifiziert. Der neue Werkstoff verbindet die positiven Eigenschaften von Holz wie Isolierfähigkeit und Natürlichkeit mit den Vorteilen von Kunststoff wie Elastizität, Leichtigkeit und individuelle Einfärbbarkeit. Das Material ist frei von Melamin,

BPA und Bambus, selbstverständlich lebensmittelecht und vollständig recycelbar.

The added bio-circular wood fibers (6.) are obtained from trees (4.) that are left over from forest maintenance and paper production waste. All wood (5.) comes from Europe and is FSC®-certified.

The new material combines the positive characteristics of wood, such as insulating properties and naturalness, with the advantages of thermoplastics, including elasticity, lightness and individual colorability. The material is free of melamine, BPA and bamboo, of course food-safe and fully recyclable.

100% natürlich. Diese innovative Materialentwicklung besteht aus rein biozirkulärem Kunststoff und Holzfasern.

Der zirkuläre Kunststoff wird ausschließlich aus benutztem Sonnenblumen- und Rapsöl (1.) aus Industrie und Gastronomie (2.) gewonnen. Die Öle werden gesammelt und in einem speziellen Recyclingverfahren in Kunststoff umgewandelt (3.). Diese Stoffe erfahren so erstmals eine sinnvolle Weiterverwendung, bislang konnten sie nur thermisch verwertet werden. Zudem werden keine zusätzlichen Ackerflächen benötigt.

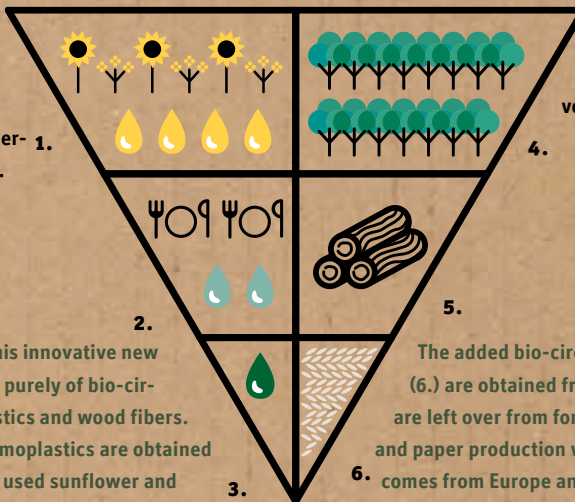

100% natural. This innovative new material is made purely of bio-circular thermoplastics and wood fibers. The circular thermoplastics are obtained exclusively from used sunflower and rapeseed oil (1.) from industry and gastronomy (2.). The oils are collected and converted in a special recycling process (3.). This is the first time that these materials have been put sensibly to further use; previously, they could only be thermally recycled. Moreover, no additional "new" resources are required.

Die zugesetzten biozirkulären Holzfasern (6.) werden aus Bäumen (4.) gewonnen, die bei der Forstpflge anfallen sowie aus Resten der Papierherstellung. Alle Hölzer (5.) stammen aus europäischem Anbau und sind FSC®-zertifiziert. Der neue Werkstoff verbindet die positiven Eigenschaften von Holz wie Isolierfähigkeit und Natürlichkeit mit den Vorteilen von Kunststoff wie Elastizität, Leichtigkeit und individuelle Einfärbbarkeit. Das Material ist frei von Melamin,

BPA und Bambus, selbstverständlich lebensmittelecht und vollständig recycelbar.

The added bio-circular wood fibers (6.) are obtained from trees (4.) that are left over from forest maintenance and paper production waste. All wood (5.) comes from Europe and is FSC®-certified.

The new material combines the positive characteristics of wood, such as insulating properties and naturalness, with the advantages of thermoplastics, including elasticity, lightness and individual colorability. The material is free of melamine, BPA and bamboo, of course food-safe and fully recyclable.

CHEERS No. 1 COLLECTION

KOZIOL SUPERGLAS

MADE IN GERMANY

**UNBREAKABLE
SUPERGLAS**

100% SUPERGLAS

With normal use, koziol SUPERGLAS is practically unbreakable and seriously scratch-resistant. Ideal for all areas where glass shards present a high risk of injury such as at the garden, the pool, and in the backyard. SUPERGLAS insulates four times

better than traditional glass, keeping cold drinks cool and hot drinks warm for longer. And it saves costs: Daily handling is made safer and easier, making it perfect for professional use.

KOZIOL SUPERGLAS

MADE IN GERMANY

**GERMAN
DESIGN
AWARD
WINNER**

**UNBREAKABLE
SUPERGLAS**

100% SUPERGLAS

With normal use, koziol SUPER-GLAS is practically unbreakable and seriously scratch-resistant. Ideal for all areas where glass shards present a high risk of injury such as at the garden, the pool, and in the

backyard. SUPERGLAS insulates four times better than traditional glass, keeping cold drinks cool and hot drinks warm for longer. And it saves costs: Daily handling is made safer and easier, making it perfect for professional use.

KOZIOL THERMOPLASTIC

MADE IN GERMANY

BAMBOO-, BPA- &
MELAMINE-FREE

100% RECYCLABLE

koziol focuses exclusively on thermoplastics, which are 100% recyclable. Thermoplastics are the most environmentally friendly materials on the market. Not only are they food- and dishwasher-safe, production is also

done without any harmful additives like formaldehyde or softeners. In the production process of thermoplastics, 90% less energy is used compared to the production of glass, ceramics or aluminum.

ORGANIC recycled

100%

RECYCLED MATERIAL

Bathrooms rethought. Since plastic is one of the best materials to reuse, we decided to create the first koziol bathroom collection made of 100% recycled plastic. This material comes from post-industrial recycling and refers to waste that is produced during the processing of new plastics. This excess and pure material is carefully reprocessed and

thus fed into new production processes. In this way, these valuable raw materials are given a second chance, saving up to two-thirds CO₂ compared to new materials. This reduces the burden on the environment and makes people happy.

EXTRA TIPPS ADDITIONAL TIPS

Und damit auch alles glatt läuft, noch ein paar Tipps extra:

Sofern es die Größe zulässt, bitte die Produkte vorzugsweise im oberen Spülkorb spülen. So werden Verformungen am besten vermieden. Produkte immer spannungsfrei in die Spülmaschine einlegen. Sollte ein Produkt sich dennoch verformen: beim nächsten Spülen findet es meist in seine ursprüngliche Form zurück, denn Kunststoff hat ein sogenanntes „Gedächtnis“. Stark färbende Lebensmittelreste vor dem Einräumen in die Spülmaschine kurz mit klarem Wasser abspülen. Vermeiden Sie Spülmaschinendeodorants oder Geruchsentferner, da diese zu Verfärbungen führen können. Darüber hinaus auch die Pflegehinweise der jeweiligen Spülmaschine beachten.

Viele unserer Produkte eignen sich auch für die Mikrowelle, bitte achten Sie auf das entsprechende Label. Alle Produkte bitte prinzipiell nur ohne Deckel in der Mikrowelle nutzen.

But to make sure that everything comes out of the machine looking just like new, here are a few additional tips:

Where size permits, please wash products in the top rack. This reduces any risk of warping.

Give products ample space inside the dishwasher. Do not squeeze them into tight spaces. Products may occasionally warp during washing, but they will usually return to their original shape after the next wash – because plastic has a built-in „memory.“

To avoid contamination or discoloration, we recommend rinsing all dishes with clear water to remove any remaining food before putting them in the dishwasher.

Avoid using dishwasher deodorizers or odor neutralizers as these may cause discoloration. And always carefully observe the care instructions provided for your dishwasher.

Many of our products are also suitable for the microwave, please pay attention to the corresponding label. Always remove lid before microwaving.

Das BESTE für Kinder.

AWARD-WINNING QUALITY

ERBACH, ODENWALD

SINCE 1927

THE KOZIOL SUSTAINABILITY GUARANTEE

Not facts, instead opinions about facts determine our coexistence." Epicetus

Is it possible to buy plastic today with a good conscience?

It is. You even have to, if you want to be live responsibly and happily. Plastic is the modern material. It has undeniably made our lives easier, more democratic and more hygienic.

Without plastic there would be no cars, no airplanes, no mobile phones, no computers, no modern medicine, no prosthetics, no pacemakers, no intensive care units, no science... plastic is the material of the 21st century.

Worldwide, there is no material that is just good or just bad and certainly not just sustainable. Even natural materials aren't always the best choice – just think: monoculture, pesticides, high water consumption.

With each new product development, the most sustainable material for the use of this product has to be chosen and utilized economically. It's about time to rethink, show more appreciation and a more differentiated consideration to different materials. Because not all plastics are alike.

The Material

We are the pioneers of material! Our koziol lab has been creating high-tech, high-quality, sustainable materials for over 95 years. The latest innovation is the original koziol BIO-CIRCULAR material, where vegetable oils from the catering industry are recycled and converted into food-grade plastic. The new material is combined with European FSC-certified wood fibers.

This is the first time that these natural raw materials have been put to sensible further use, as previously they could only be thermally recycled. Moreover, no additional "new" resources are required. The new materials combine the positive characteristics of wood, such as insulating properties and naturalness, with the advantages of thermoplastics, such as elasticity, lightness and individual colorability. They are free of melamine, BPA and bamboo, of course food-safe and fully recyclable.

And best of all – everything is manufactured 100% climate-neutrally in Erbach in the Odenwald forest. koziol – the sustainable brand.

Design & Function

Already in the design phase, great attention is being paid to sustainability – focus lies on the longevity of the products. And not only because of their unique combination of function and emotion, products made from thermoplastics are used year after year, thus proving their ecological advantage.

koziol never makes one-time use products, but rather companions for life. koziol products are robust, lightweight, unbreakable, ergonomic, and suitable especially for children and seniors thanks to their easy handling. Thermoplastics are virtually unbreakable and lightweight, demonstrating a huge advantage over materials like ceramics, glass or metal!

Resource conservation is also considered in the design phase: Construction in one-piece, optimized wall thickness, and short cycle times allow for efficient and energy-saving manufacturing.

Made in Germany

koziol has been manufacturing products since its founding in 1927 exclusively in Erbach/Odenwald in Germany. Design, development, construction, mold making, manufacturing, shipping and administration all under one roof.

koziol and its philosophy of manufacturing exclusively in Germany represent a responsible, future-oriented corporate strategy and design with a good conscience. Made in Germany was and remains an essential part of koziol's successful philosophy.

koziol has been producing exclusively with green energy since January 1, 2013, saving around 1,276 tonnes of CO₂ annually. German raw material suppliers are preferred and manufacturing under one roof rule out long transport routes. For the logistics of finished goods, koziol cooperates with a worldwide partner company who shares its strict sustainability principles.

The company has been awarded the 2021 Ensured Sustainability seal of approval, which assesses comprehensive sustainability in the areas of ecology, economy, and social competence. Likewise, koziol is certified according to SEDEX.

For 2021, koziol can guarantee that the company operates in a CO₂-neutral manner. 70% of this neutrality is achieved by the company through savings in CO₂ emissions achieved through its own measures. 30% will be offset by intelligent reforestation of an existing forest on the island of Rügen with new, climate-resistant tree species and maintenance of the existing population.

Social Responsibility

koziol manufactures exclusively in Germany, therefore abiding by strict German labor and social laws. The safeguarding of jobs, performance-related pay, opportunities for the acquisition of skills as well as the possibility for parents to work part-time are all natural components of koziol's company culture.

Great importance is also placed on apprenticeships – currently seven apprentices are being trained in various departments. This secures a base of well-educated experts and guarantees the company to be sustainable for the future.
