INTRODUCTION

Room for Excitement.

The purpose of our collection is to bring excitement to everyday life and help materialize your personal expression through products that are not only aesthetic and purposeful, but also unique, and timeless and that adds value to your space.

Being able to choose what feels right to you is essential, and that is what the Verpan collection offers. We continuously tap into Panton's heritage when re-imagining products and solutions that help us solve modern challenges and rethink the ways we live, work and meet.

Our collection of furniture, lighting and accessories is available in a variety of colours, finishes, fabrics and more that lets you get creative and allows you to find the pieces that positively influence your wellbeing.

Verner Panton fully believed in the importance of creating an attractive space over the importance of the single object. He had a holistic approach to design and once stated: "the relationship to the environment is much more important than a single chair or object. The space, the colours, the furniture, the textiles and the lighting must be thought and experienced together. The attractive environment can only be created when you really master the whole".

Explore our collection and get excited.

MORE RELEVANT THAN EVER

Verner Panton.

Verner Panton (1926-1998) was a man of many facets. His journey began with early dreams of making it as an artist, which later led to an education in architecture and him finally finding his place in the world of design. Along the way, he was mentored by the likes of Arne Jacobsen and Poul Henningsen, who both were instrumental in shaping and influencing him on his path to become one of the most prominent designers of the 20th century.

Throughout his career, Panton enthusiastically embraced new materials and discovered new ways to approach product- and spatial design. His ability to bridge healthy ergonomics and purposeful functionality with imaginative, organic shapes and bold colours - without ever compromising on quality or workmanship - was a constant in his experimental design process and still highly recognized today.

Despite of his provenance and large contribution, Panton was always considered an outsider among his contemporaries of the mid-century Danish Modern era. Always being on the forefront of innovation meant he was never considered mainstream, nor did he aspire to be. He was always more interested in raising questions and challenging the status quo. He was a provocateur. A rebel.

A famous quote by Panton to describe himself and his work was: “The main purpose of my work is to provoke people into using their imagination. Most people spend their lives in dreary, grey-beige conformity, mortally afraid of using colours. By experimenting with lighting, colours, textiles and furniture and utilizing the latest technologies, I try to show new ways to encourage people to use their fantasy and make their surroundings more exciting”.

His work ultimately led him to pursue a future outside of Denmark to find suited collaborators and partners, and he settled in Basel in 1963. During his career, Panton worked with some of the most prolific design companies, carving out a name for himself both in Denmark and abroad.

Panton also became a sought-after interior designer. Among his most recognized installations are the Visiona 0 and Visiona 2 furniture fairs in 1968 and 1970, the 1971 remake of the Varna restaurant in Aarhus and of course the 1969 complete installation for German publisher, Der Spiegel's main offices in Hamburg.

Panton's iconic designs have emerged as contemporary design classics – as strikingly inventive now as they were 50 years ago.

As a reflection of individual style and taste, the home represents a personal concept of wellbeing realized through the use of space, objects, light and colours.

BARBOY / 1963

Panton designed the Barboy at a time when he was inspired by free, mobile rooms. The idea was that spontaneous conversations could take place without bumping into obstacles.

It was from this spirit that the idea for the Barboy emerged: a mobile storage unit, which, apart from serving as a drinks cabinet in the living room, could also work as a practical little chest of drawers.

Panton's goal was to design a piece of furniture, which, besides providing storage for bottles, glasses and other cocktail utensils, would also be perfect for use in a bedroom, hallway or office.

PANTOP Ø23/ 1980

For long, the Pantop series has been a staple of the Verpan collection. The Pantop line's idiom is best described as decorative and elegant.

Keeping with its bell-shaped, widely flaring shade, Pantop offers an almost optimal combination of ambient and functional lighting.

The Pantop is designed to fit into a wide number of settings and interiors. The table lamp fits perfectly in the window sill, bookcase or counter, and the pendant works equally well on its own as it does in clusters giving you the freedom to be creative and create your own personal expression.

FUN 11DM Pendant / Brass Finish

FUN 1WM Wall Lamp

FUN/ 1964

Many regard the Fun collection as one of Verner Panton's greatest masterpieces in the field of lighting design. Ever since 1964, this pendant lamp has kindled joy and a wealth of stories. The idea for Fun came from Panton's desire to design a lamp, that would cast a diffused light, and have an optimal effect in a coloured interior.

In terms of materials, Panton originally worked with metal discs but was curious to create something brand new and during a visit to Malaysia, he found what he was looking for: delicate seashells with a vibrant, pearly texture.

When the air set them in motion, they produced the most exquisite, delicate sound. At the same time the UN were looking for ways to generate more jobs in developing countries. Panton could help this effort by using seashells for his Fun lamps.

Today, the Fun collection is available in a wide variety of finishes, sizes and include pendants, floor, table and wall pieces.

@TRINEKJAER_

Trine has a deep appreciation for colour, which shows throughout her home.

AT HOME WITH

Trine Kjær

For the past year, Trine Kjær has been working with Verpan as a sponsored brand ambassador. Trine has for years been fascinated by design and interior design, and early on in life she fell for Verner Pantón's unique designs. Like Verner Pantón, Trine is not afraid to use colours and shapes in her decor, which is naturally expressed in her and her family's beautiful home north of Copenhagen.

Can you briefly introduce yourself and what you do?

My name is Trine Kjær, and I have worked as a content creator and stylist for the last 10 years. My family and I have recently moved to a house north of Copenhagen that we are now decorating.

When did your interest in Verner Pantón design begin?

My first memory with Verner Pantón was the Phantom Chair that one of my girlfriends got in her room. I thought it was the wildest and most futuristic design, and I was completely in love with its multifunctionality.

Which Verner Pantón design is your favorite and why?

There is no doubt. Cloverleaf Sofa has been my favourite piece of furniture for many, many years. It is like no other sofa. It invites conversations, looks like an art installation, but at the same time it is very comfortable and fits perfectly in a home with children.

What role does Verner Pantón's design play in you and your family's daily life

First and foremost, Verner Pantón's designs make me happy. They are sculptural and aesthetic, but at the same time they are actually perfect for families with children. They invite play, and it is always Welle or Cloverleaf my daughter sits in and reads books. I love the combination of how beautiful they are, but also how comfortable and practical they actually are.

In what ways does Verner Pantón inspire you, and how does his design contribute to your style?

I love Verner Pantón's modern aesthetics. It is unpredictable, futuristic and at the same time classic. I love his fascination with round shapes and his understanding of colours, of course.

You have added Welle and Cloverleaf Sofa to your decor, both among Verner Pantón's more unique designs - why did you choose these particular designs?

I am generally very fascinated with organic forms. I love that, unlike most Danish designs, they have soft and not sharp edges, and both designs are statement pieces – that is, furniture you immediately notice, and you want to touch and sit in.

The two-unit Cloverleaf Sofa is upholstered in Vidar by Kvadrat. The iconic sofa is accompanied by the Wire Floor Lamp.

There seems to be a strong connection between the fashion industry and Verner Panton, and in recent years PRADA, Dries van Noten and Danish RAINS have used his designs in different ways. You yourself are also involved in fashion - why do you think that Verner Panton attracts this interest in the industry?

Verner Panton was so ahead of his time. He was brave and used modern materials like steel and plastic, and on top of that he was so good with colours and shapes. His designs are daring but still classic, and you are never in doubt that he is the one who made them. These are exactly the values that most fashion designers would like to be associated with.

Can you put into words how you decorate your home with and work with colours and composition of colours?

Colours are life to me. I love looking at colours, and I think it adds some warmth and personality to my home. At the moment I am very fascinated by primary colours like green, red and blue and I mix them with more douce colours. In our home there are no black things and no white walls. I have learned over the years that I should not be afraid to choose furniture or things in colours. These are always the things I end up being the happiest with. Such as a coloured Chanel bag or a pink Welle. A coloured statement item allows you to keep the rest of the room fairly neutral.

Wire Floor Lamp.

Welle 4 in Vidar by Kvadrat.

Where do you find inspiration for your decor?

I primarily find inspiration in old houses and hotels in Southern Europe. Villa Magnan is my dream place. I am not so Scandinavian oriented although I love a beautiful oak table. I'm more into the slightly more eclectic that I think Verner Panton masters (even though he's Danish). In addition, I love Pinterest, design books and Instagram.

Trine is a sponsored partner of Verpan.

MOON / 1960

Designed in 1960, the Moon represents one of Verner Panton's earliest lighting designs.

The iconic pendant is characterized by its fan-like design with ten ring-shaped aluminium lamellae perfectly positioned to provide a soft, ambient and glare-free light. The blades reflect and filter the light and the pendant changes its appearance depending on the angle at which you view it.

Due to its simplicity in design and white finish, the Moon lamp is incredibly versatile and can work in a number of settings – as a single piece or in clusters.

VP GLOBE / 1969

Originally conceived in 1969 by Verner Panton, the VP Globe is arguably the most recognized Panton lighting design.

The decorative pendant features a crystal clear transparent acrylic outer sphere with five internal reflectors suspended by three steel chains.

A little-known story behind the inspiration of Verner Panton's lighting is the Venice influence. Panton was known for his desire to explore, travel and experience different places and cultures. One of his favorite destinations was Venice, Italy, and he paid several visits to the famous 'city on the water'.

It was in fact during one of these visits, that he fell in love with the slightly rose-coloured light emitted by the old street lamps in the city – so much so that he wanted his future lighting designs to simulate that unique experience.

The VP Globe is perhaps the most successful execution of this early inspiration, as its special layered design paired with the acrylic globe emits a warm, soft and ambient light – a signature of Panton.

True to Panton's creative approach, the VP Globe is available in various configurations and sizes – exploring different materials and expressions.

All VP Globes are assembled 100% by hand in Denmark.

SERIES 430 Chair/ 1967

In 2015, Verpan re-discovered a forgotten dining chair in the Pantón archives. The design was unknown to most, as it only had a brief production run following its original release in 1967.

Based on Pantón's original drawings and notes, Verpan re-imagined the beautiful design to modern standards. Verner Pantón had designed the Series 430 Chair to be a study in simplicity, while providing the same comfort as an armchair.

He did so by applying traditional webbing to the fully upholstered seat to adjust for body weight and create a wide nestling backrest and place it on a slender elegant frame that mounts on the outside of the seat and back.

The Series 430 chair truly is a multipurpose chair and can easily be applied anywhere in a home and with five different frame colours to choose from and a wide variety of upholstery options, the Series 430 can be customized to suit any desired mood, setting or occasion.

Fun fact - the Series 430 Chair is the only four-legged chair designed by Pantón.

WELLE Lounge/ 1969

To refer to Panton's Welle furniture as mere *lounge furniture* could be considered an understatement. Unmistakably Panton, these wildly imaginative organic shapes represents a sense of free-spirited thinking, unhinged from conventions and tradition – instead sparking our emotions, curiosity and creativity.

Welle is available in six different silhouettes that can either stand alone or go together to create an entire landscape.

The pieces are light and easy to move around.

CLOVERLEAF Sofa/ 1969

When ordinary just won't do. Designed by Verner Panton in 1969, the Cloverleaf design stands out as one of his most unique works – sculptural, organic aesthetics and functional qualities combined in a modular sofa offering almost infinite opportunities for personal expression.

Cloverleaf was conceived as a sprig of clover, meandering and unfolding as it gets longer. In the middle, the seat is divided by a backrest, which wriggles out of the seat. As well as providing the necessary back support, it also shields you from people sitting on the other side. This one-of-a-kind sofa is one of Panton's masterpieces.

@MICHAELDANSK

Michael lounging in his Welle 4.

AT HOME WITH

Michael Dansk.

Meet Michael Dansk. A Copenhagen-based creative who since childhood has been intrigued by great design and today has turned this fascination into a career.

Tell us a about yourself.

My name is Michael. I am a 32-year-old Copenhagen-based creative consultant working in the field of culture and design. Basically, what I do is tell stories in images and words to bring brands to life. For many years, I worked as a magazine editor before I started my own business a few years ago. Besides this, I share my passion for interior, art and design via my Instagram channel @MichaelDansk. My take on interior is maybe a little more colourful than the typical Scandinavian, but colour and art simply inspire me. I live with my partner and two children in the heart of Copenhagen's lively Nørrebro neighbourhood surrounded by all sorts of cafes, bars and small shops.

How did you get into interior design?

I have always loved interior, growing up in a family of architects, I knew all the big names in Danish design before I was even 10 years old. Until 5 years ago, it was merely a hobby for me. I was working as a fashion editor for a DK magazine and one day, I was simply asked to cover all interior related content as well. From there my career sort of shifted more and more towards interior and design, and today almost all of my clients are within this area. So in a way, my childhood passion ended up growing into a profession.

Where do you find inspiration?

I am lucky to work with a great number of talented people within the field of interior design on a daily basis, so I really get a lot of inspiration from the

people around me and their individual ways of working. Besides this, art is a massive inspiration to me. I collect works by young Scandinavian artists, and often use works of art to set the mood in interior styling and other visual projects. I have always been fascinated by names like Vilhelm Lundstrøm, his way of combining colour and shape is truly genius. Besides this, I think my style is very much influenced by different elements. My background in fashion, my love for travels and culture, my passion for art and my interest in architecture.

What is your relationship with Verner Panton?

Panton and I go way back. I grew up with several Panton designs in my childhood home, and remember seeing a fantastic Panton exhibition at Trapholt museum, when I was a kid. Naturally, the Panton Globe was the first lamp I bought, when I got my first apartment in Copenhagen 10 years ago.

Photo: Monica Steffensen

Welle 4 and Welle 6 (Vidar 542 & 1511. Kvadrat).

A yellow Hive pendant adorn the kitchen.

It is hard to pinpoint, what has been drawing me to Pantons' design. I think it might be his playful approach. I really like his way of experimenting with materials, shapes and colours in a fun and interesting way. Even if many of his iconic pieces are about 50 years old now, they still seem relevant, and have a futuristic edge that I really enjoy.

How do you see Pantons influence today?

Many of Pantons' designs have a rather futuristic look to them and have kept that to this date. In a way, his design keeps feeling fresh and contemporary. I think his approach to form, material and colour is somewhat different to many other big Danish designers, which makes him stand out and makes his design feel rather unique. Also, there is a lot of focus on textures and colour at the moment, and his original designs truly show how to incorporate colour and unusual materials in a fun and easy way.

Favourite design from the Verpan collection?

For me, it is hard to pick a favourite. The Globe is probably the design I liked for the longest time. Recently, I have grown to like some of his furniture pieces more and more. He designed some super cool coffee tables and I really like the System 1-2-3 series in general.

Michael Dansk is a sponsored partner of Verpan.

The Wire Table Lamp and System 1-2-3 Lounge Chair Standard (Pilot 972, Kvadrat) make a wonderful pairing in the living room.

UPHOLSTERY PROGRAM

The Verpan Upholstery Program is an overview of textile and leather available for the Verpan upholstered furniture. The listed fabrics and leathers are available in all colours.

In addition to the options listed, we have tested several other fabrics and entered trade agreements with a number of other suppliers, which enables us to answer most customer needs. We are also happy to upholster furniture using customer's own materials (COM) with extended lead times.

For special requests, please contact our sales team.
