CARE GUIDE — TEXTILE

HOW TO CLEAN / POLISH

WOOL

Daily cleaning: Use the vacuum cleaner frequently — especially when the rug is new, as it will produce shed fluff for a period of time.

Stains: Immediately dab the area with a white cotton cloth to prevent the stain to penetrate the fibers. Carefully sprinkle a bit of water on the stain and dab again with a white cotton cloth. If the stain has not disappeared the rug should be cleaned by a professional. Never clean the rug with chemicals.

(Note that colours may fade if the rug is exposed to strong sunlight for a longer period of time)

(Staining from the backside of the rug might occur. It is therefore recommended to use an underrug on vinyl, oiled and untreated floors)

(The rug is handmade and size deviation +/-3% is accepted)

STORYTELLING

MOLA RUG / BY AYTM DESIGN TEAM

A milestone with MOLA. MOLA is the Latin word for stone and the rug appears as a visual presentation of just that. The “stones” of MOLA are designed in perfect harmony and symbolizes the milestones in our lives.

The different levels, materials and structures of the rug are a manifestation of significant moments that we experience and from which we evolve.

The meaning of stone is furthermore a reference to natural surroundings, where the materials found in each “stone” of MOLA rug, embodies the diversity of Mother Nature.
