Conform Collection

# Stay in your comfort zone.

It's outside its borders that it all happens, they say. That's where you perform at your best, that's where you grow as a human being.

And so you are constantly asked to leave your comfort zone.

But do you really have to do that, all the time? We say no.

We think you should be allowed to stay there as long as you want. Unwind, get your thoughts in order, enjoy the moment ... or just relax.

With a Scandinavian sense of form, unique functionality and craftsmanship made to last for decades of use, we create armchairs for all those occasions when you take that well-deserved step back.

We make it harder than ever to leave your comfort zone.

#### 4 | ABOUT CONFORM

- 10 | **TIMEOUT** | Design your own Timeout
- 14 | **TIMEOUT** | A perfect relaxing chair
- 18 | **AFTER WORK** | Where you feel at home

- 70 | **TURTLE** | A shield from everyday stress
- 72 | **SHABBY** | Lounge delux
- 74 | **TABLES** | Timeout | Gaga | Funco | Gazell

#### HOW COMFORTABLE DO YOU WANT TO BE?

Your body and your style shouldn't have to adapt – we will do that instead. For many of our armchairs, you can choose between different types of wood, different legs and various heights. Upholstery – in fabric, leather or sheepskin – is offered in more than five hundred variants. It's your comfort zone, so you make the decisions.

Your lower back changes, and your body's center of gravity shifts, depending on how you sit. In ergonomical terms, this is called the sitting curve. And at Conform, we have followed it ever since we started out back in 1978.

By us going straight to the sitting curve in each new project, our furniture has become recognized as some of the world's most comfortable. Regardless of style and function, we work hard to ensure that the armchair always adapts to the person sitting in it.

The technology we have developed to achieve this is called Syncro Backup, and it's built into almost all of our armchairs. You can't see it. But as soon as you sit down, you will feel what we mean.

**Straight to the curve.  
Always.**

# We have your back.

6

In 1978, we started manufacturing armchairs in Holsbybrunn, Småland. And that's exactly what we keep on doing today, more than 40 years later. We're kind of proud of that. In our minds, specialization is the natural way to go if you want to create something truly special.

But we are not standing still, as you might be inclined to think right now. Materials, design, manufacturing methods and sustainable thinking are always moving forward. And these days our armchairs are moving into more and more living rooms, in the Nordics and Europe as well as on the other side of the Atlantic.

Over the years, we at Conform have given hundreds of thousands of human backs their well-deserved rest in faithful everyday companions. Now and forever, we intend to prove that ergonomics is not a worn-out concept – it means taking care of and meeting your body in any position.

# Swedish craftsmanship to lean on.

Mile after mile of dense forest is your constant companion, no matter which route you take through the Swedish province called Småland. But here and there a clearing suddenly appears. And what you then encounter is likely a furniture factory. Without much in the way of other raw materials to work with, the furniture industries became perhaps the main feature of our province.

In the old days, no one got anything for free here. Almost everything required hard, painstaking work. It shaped the people of Småland, who became sensible, honest and persistent – qualities that also formed the framework for our furniture industry. A piece of furniture from Småland did not shout "Here I am", but calmly expressed "I'm here for you."

Conform is only a toddler compared to other furniture companies around here. But the heritage is nevertheless recognisable at our factory. The materials mostly come from Swedish suppliers, which we know well and have collaborated with for many years. They all need to live up to our demands and expectations of a high and consistent quality and of sustainable action.

We build our armchairs to last for decades – which they will, especially if they receive a little bit of care from their owners when needed. If they, somewhere down the line, require a new attire that can be arranged, too. They are all made for that.

We want our chairs to be pieces of Swedish craftsmanship that you can always lean on.

# Uncomfortably tested for a comfortable life.

Using digital simulations, we identify and correct problems before even making a prototype.

And when a new armchair is ready for manufacturing, it has not only reached the design and technical perfection we think it needs to have. It has also survived a stint in our torture chamber – sorry, our test lab.

In addition to good old durability tests using mechanical pressure against the back, seat and foot, we have also devised our own methods to attack the armchair from all angles.

In a device built for its purpose, the seat and backrest are tested in cycles where pressures of 120 kg (seat) and 40 kg (backrest) are applied – 100,000 times. The durability of the armrests are tested in similar fashion, and to top it off, we drop an incredibly heavy sack onto the seat.

Every once in a while, we also pick a randomly selected, unsuspecting armchair from the production line and bring it through the entire procedure, just to make sure the quality doesn't degrade over time.

A comfortable armchair that wishes to live a long time in someone's home must be prepared to endure a lot of things. Especially if it comes from Conform.

# DESIGNED FOR EYE AND BACK.

It is something of a special challenge to design a piece of furniture that needs to appeal to the eye and at the same time must match the technology on the inside. For many years we have collaborated with a small group of designers who understand and base their work on that equation.

Together we turn their ideas into reality, find new technical solutions, new materials and new, surprising combinations.

The result is a product range with a great diversity of species, but where each piece of furniture feels all Conform once you get to know it.

**Jahn Aamodt**  
Designer, Norway

“The design needs to satisfy the desires of the user and the surroundings, and perhaps also the society. I strive to create designs that have a personality and a character to survive long-lasting use.”

**Niels Gammelgaard**  
Designer, Denmark

“We are not interested in doing design for the facade. We should not do more of what already exists, but rather make more out of the existence of design. It's about finding the core benefit of design that will do your life good.”

**Jan Ekström**  
Designer, Sweden

“I strive for a true vitality in the lines of my furniture. I try to reach for a naturally bold expression in order to turn the design into a new favourite armchair every time.”

**Lenka Teilmann**  
Designer, Denmark

“I want my design to follow a timeless style, enhanced by handcrafted details. It needs to be contemporary, but also appealing enough to reach a wide audience.”

# Design your own Timeout.

Adjustable headrest

Upper and lower part of the backrest interoperate for optimum ergonomics

The angle of the footstool suits everyone regardless of length

Adjustable backrest with a simple grip you can alter the angle of the back

Always returns to its original position

Choose fabric, leather or sheepskin. Choose wood or upholstered base. Choose swivel foot or leg – and if you choose the aluminum foot, quattro foot or wood/aluminum foot you can even choose height. Choose your backrest height.

Jahn Aamodt, the designer of Timeout,

believes that “design should satisfy the desires of the user, the company and the society, and have a personality strong enough to last for decades of use.”

That notion is especially true for Timeout, the perfect relaxing chair that always returns to its original position when you leave it.

# The personality is created through freedom of choice.

The comfort through intelligent features.

**Base**

- 1. Upholstered
- 2. Black Stain Oak
- 3. Oak Laquered
- 4. Oak Untreated
- 5. Walnut

# Timeout.

## The armchair that conforms to your wishes.

12

### 1. LEATHER FANTASY BLACK

Base: walnut

Foot: swivel molded aluminum

Footstool: X-foot

### 2. LEATHER JESOLO EUCALYPTUS

Base: black stain oak

Foot: swivel Quattro black aluminum

Footstool: X-foot

This is not just any armchair – it's your armchair. With your choice of details and colours, you can show your personality and let your style take centre stage.

The combination of leathers and fabrics, on the armchair as well as on the footstool, allows for many individual choices. A discreet matching or

daring contrast? Nothing is ever wrong.

Timeout can be turned into anything from a faithful everyday servant to a colourful solitaire that makes your living room a show room.

Also keep in mind that a fine leather surface will age gracefully. It is made to be used, and it gets more beautiful with each passing year.

In the image to the left, the armchair appears with the leather Fantasy Black.

## TIMEOUT

A perfect relaxing chair by Jahn Aamodt

# Your comfort zone now comes with a soundtrack.

With an integrated sound system as sophisticated as the chair itself, MyPlace brings you comfort on a whole new level. Designed in Sweden and unique to Conform, the listening experience is pristine and precise, whether your company is Shakira or Shakespeare, Bee Gees or Beethoven.

MyPlace is an enhanced comfort zone, where a pure listening experience blends with the Conform craftsmanship in complete harmony.

The sound system has been developed right alongside the armchair, from rough draft to fine-tuned perfection.

The Bluetooth® connected speakers provide an outstanding sound. Then the shape of the headrest not only directs the sound to your ears – it also isolates it from the surroundings. Take one or two steps back, and the sound can hardly be noticed. How can that be?

The simple explanation is that MyPlace is the result of a close collaboration between experts. Our furniture knowledge has been combined with the audio expertise of Orlo, one of Sweden's leading companies in their field.

Orlo's unique, compact platform delivers an astonishing sound while being highly adaptable for many different applications. Armchairs turned out to be one of the best examples – and we are proud to have the exclusive rights for this type of use.

**THE CONFORM SOUND EFFECT**

The sound is experienced by the person sitting in the chair.

**1. LEATHER JESOLO COGNAC**

Foot: swivel Quattro aluminum

**2. LEATHER FANTASY BLACK**

Foot: swivel molded aluminum

**3. FABRIC PERON OLIVE**

**4. LEATHER JESOLO COGNAC**

Foot: swivel Quattro black aluminum

**FOOTSTOOL**

Leather Jesolo Cognac

Leather Fantasy black

Fabric Peron Olive

In the image to the left, the armchair appears with the leather Bolzano Grey.

**OPTIONAL BUILT-IN SOUND SYSTEM**

MyPlace is available with or without our built-in sound system. If you choose a leather version with sound, there are two small speaker outlets in the headrest (right and left) for an optimal sound. MyPlace in fabric looks the same with and without sound, as the sound goes unfiltered through the fabric.

Lounge deluxe by Lenka Teilmann

**Upholstery** Leather or fabric. **Legs** Chrome or black metal. You can choose model with or without armrest. **Stitching** In leather this model is only

available with cross stitching in contrast color or matching color of thread to the leather. In fabric it is only available with normal matching stitching.

# EXPAND YOUR COMFORT ZONE.

All right, we confess: We do not make armchairs exclusively. Inbetween our armchair development projects, we had a go at designing some side boards – and the results where so good that we simply couldn't help producing them. Of course, they are built on the same high standards as the rest of our range – and designed to expand your comfort zone.

## TIMEOUT table
