CARE GUIDE — METALS

HOW TO CLEAN / POLISH

BRASS / STAINLESS STEEL

Make sure the metal is clean for dust and dirt on all surfaces before you begin polishing. Then apply an adequate amount of metal polish for brass / stainless steel with a soft and dry cotton cloth to the item. Use a soft & dry cloth to polish the surface before the polish has dried.

(Make sure to read the instructions on the metal polish for specific guidance)

POWDER COATED IRON / STEEL / ALUMINIUM

To get rid of dirt and dust, mix a mild detergent with warm water. Dip a lint free cloth into the water & wipe the item down with the cloth. If necessary, wipe the item dry with a soft dry cloth.

(Avoid scraping or rubbing the powder coating with an abrasive cloth that could damage or remove the coating from the surface)

STORYTELLING

CASTELLUM SHELF / BY HENRIK JOHANNES DRECKER

The talented product designer, Henrik Johannes Drecker, has created the CASTELLUM shelf, whose graceful golden sphere aligns the entire collection, originally inspired by the majestic Danish church Grundtvigs Kirke. The divine expression of this design cultivates structure and simplicity in an unseen way. The shelf stands as a geometrical, simple piece but has an enormous effect due to the reflective and warm surface of the gold, while the matte black makes an aesthetically present contrast to the golden shine.
