

Reading lamp with direct light, made with two resin molded bodies. The lower body part turns on a steel made base connected with the upper body part by means of a central joint for a 360° rotation. The interior reflector is made with white painted aluminium.

Designed by Elio Martinelli in 1968, Cobra is one of the first lighting fixtures produced with a special resin molding system. The lamp is characterized by simple lines and a geometric shape inscribed in a sphere, but, with the rotation of the arm, the reflector takes a position that recalls the head of a cobra ready to shoot.

Cobra 629		Data Sheet	
Family Typology Utilisation	Cobra Table Indoor		
Dimensions			
Height	40 cm		
Diameter	40 cm		
Power supply cable length	40+200 cm		
Weight	8.8 Kg		
Materials			
Structure	resin	Riflettore aluminium	
Base	resin		
Voltage	230V		
Certifications		EcoLabel
