

# Fauteuil de Salon

Jean Prouvé, 1939

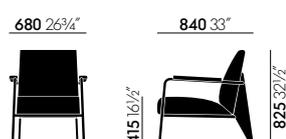

Fauteuil de Salon joins simple planes into a unified architectural object with a comfortable seat surface and backrest. Rediscovered in the archives of the French engineer Jean Prouvé, the classic armchair now comes in a choice of fabric and leather covers as well as an extended range of original colours for the metal parts. The generous padding of the

cushions and the armrests in light or dark solid wood emphasise the inviting appeal of Fauteuil de Salon, whose timeless design vocabulary based on functional requirements lends itself to a wide variety of interiors.
