

MUNA

by e-ggs

Muna is a more playful Moon, stretched yet irresistibly captivating: at 110 cm in length, it's almost worthy of praise. Its lampshade, made entirely of recycled polyethylene, casts a soft, extended glow—a presence that delights even from a distance.

PE LIGHTING COLLECTION MADE FROM 90% RECYCLED POLYETHYLENE

Second life for post-consumer waste

- Reuse of industrial waste
- Sorted by color and melted at controlled temperatures, ensuring sustainability from the production stage
- Recycling of mono-polymers supports a truly circular process, allowing the material to be reused endlessly without loss of quality

The Moon Landing

- Tactile lampshades evoking the surface of the moon, expressed through a warm, atmospheric, and contemporary aesthetic
- A texture shaped by the varying density of LDPE granules
- The LED light interacts with the product through its transparency, transforming and diffusing into the surrounding space

A new sustainable material

- LDPE: Low-density polyethylene
- Extremely lightweight and durable
- Stable between -10° and +50°
- Fully recycled and recyclable
