POETRY IN MOTION

POETRY IN MOTION

GUBI presents the Seine Portable Lamp by Space Copenhagen

GUBI's introduction of a dedicated portable version of Space Copenhagen's Seine lighting concept allows lovers of design to bring its magical, mood-setting play of light into any space, effortlessly moving between indoors and out as they desire.

"The Seine design transitions perfectly to a portable version – it feels easy and effortless to use as a lantern for many purposes. We love that the handle is a part of the body of the lamp itself, and that it feels genuine, refined and sturdy, even though it is truly flexible."

– Signe Bindslev Henriksen and Peter Bundgaard Rützou, Designers, Space Copenhagen

Inspired by the behavior of light on moving water, Seine draws on the layering and blurring effects of glass to practically illuminate spaces while creating a dreamy and reflective atmosphere. By making the design mobile, Space Copenhagen has created the ultimate modern lantern, taking portable lighting to a new level of elegance and craftsmanship.

"In the Seine Collection, we have found our inspiration in nature, in the motion of water. We have investigated the beauty and possibilities of working with glass, a natural, liquid material, which has a magic life of its own. This intangible poetic quality is a very welcoming motif for an outdoor ambience, whether that is for a green garden setting or as for an urban terrace environment."

– Signe Bindslev Henriksen and Peter Bundgaard Rützou, Designers, Space Copenhagen

Like its static counterparts – the Seine Pendant, Ceiling Lamp, and Table Lamp – the Seine Portable Lamp's defining feature is a shade in patterned mouth-blown glass – a modest, modernist design with vintage references. The clover-like, dome-shaped shade is created by blowing the glass into a mold, allowing it to set into its distinctive grooved shape, evoking the shimmer and motion of a gently flowing river. It remains a beautiful object even when switched off.

Affixed to the base by four metal arms, the glass shade has a distinctive depth thanks to its transparent outside and sandblasted inner surface. This, in combination with a digitally created surface pattern and a frosted-glass diffuser that houses the bulb, gives the lamp's light a soft, textured, and poetic quality.

"The Seine Portable Lamp generates a soft, ambient light that creates an enchanting atmosphere. Space Copenhagen has developed a materially rich, well-crafted design, with both refined and industrial details, that lets you set the perfect mood wherever you take it."

– Marie Kristine Schmidt, Chief Brand Officer, GUBI

Used either individually or deployed in clusters on long tables, Seine Portable Lamps offer the flexibility to extend afternoon barbecues into evening soirées under the stars, and to keep enjoying the life alfresco even as summer shifts into autumn. Indoors, the lamps are ever-ready companions, able to transform dark corners into cozy reading nooks, or guide night owls on midnight wanders around the house. A touch-activated three-stage dimmer set into the base

allows the user to set the light level that the atmosphere demands, or to brighten up outdoor spaces in stages as the sun sets.

"Seine is a compact design that sits beautifully well in so many settings – on the table, on the windowsill, on the bookshelf, or outside on the patio. It has such an affinity with the outdoors, it makes perfect sense to have a portable version of this charming lamp."

– Marie Kristine Schmidt, Chief Brand Officer, GUBI

The Seine Portable Lamp incorporates a specially developed LED lamp and integrated battery pack. A bespoke docking plate, fitted with a steel weight ring and powered by USB-C, acts as permanent base and charging station, returning the Seine Portable Lamp to full capacity in around eight hours of charging time. A single charge can provide from seven to 50 hours of light, depending on the dimmer setting chosen. Although it should be charged and stored indoors, the lamp is splash-proof and resistant to sand and soil, so can be freely used in every outdoor setting.

PRODUCT INFORMATION

In stores

Available from March 2nd 2023

Recommended retail prices

SEINE PORTABLE LAMP:

2,999 DKK

3,999 SEK
