## Hybrid SPACES

A hybrid space emerges from the interaction between different environments, from the fusion of their processes and functions.

For &Tradition, we see hybridity as the blending of the boundaries of home, office, and everyday life. Today, we understand these spaces in a new way, where the whole is greater than the sum of its parts.

By connecting these spaces, a new system has emerged, and where once the office was for work, the home was for relaxing, and everyday life was spent juggling the two – the hybrid space melts these elements together, fostering a new and improved work-life balance.

Explore the newest pieces in our collection of furniture, lighting and accessories, designed to blend boundaries and explore the concept of hybridity.

## Portable lamps

From Space Copenhagen's Como, Manhattan and Lucca lamps, to the more mushroom-shaped Setago by Jaime Hayon and iconic Flowerpot by Verner Panton – our collection of portable lamps help you to bring soft ambience wherever you go: from the house, to the garden, or the terrace.

## Objects

From Space Copenhagen's 'Collect' series to All the Way to Paris' softer additions, the accessories we adorn our shelves, floors, sideboards, desks and lobbies with make up the larger structure of a room. They are the final touches which help ground a home or elevate an office environment – but they can also be the bond that ties the two together.

## *Collect* by Space Copenhagen

A series of soft furnishings and home objects, Collect utilises natural tones, textures and shapes to help ground your home in a feeling of identity, quality and longevity. Mix and match pieces such as our new patterned glass and carafe set with the natural structure of a mouth-blown vase, or structured and beautifully crafted trays, to create an environment that's stylized, yet homely.

## All the Way to Paris

By collaborating with All the Way to Paris, our collection has been enhanced with a number of accessories that help to elevate your home. It started with The Moor, a series of handloom-woven rugs in earthy tones, and has now branched into pieces which help to define a space, from soft throws to luxuriant bedspreads.

## Our approach to sustainability

### Built to Last

Since 2010, &Tradition has worked in collaboration with Scandinavian and international designers with the ambition of creating quality furniture and accessories, focusing on timeless appeal and a 'built to last' mentality. By marrying tradition with innovation, &Tradition's collection ranges from modern masterpieces to reissued Danish classics that we are thrilled to bring into contemporary homes and spaces.

Sustainability is part of our every day; it informs our decision-making, our processes, our designs and our work ethic. It is something we take seriously, and we understand that we have a responsibility to limit the impact of our designs and a duty to work towards a more sustainable future. We are more aware than ever of the impact our industry has on local and global communities, and we freely admit that we will never be perfect. However, we strive to reduce our ecological footprint even further, and we are committed to creating sustainable and ethically sourced, long-lasting design pieces that will bring joy for many years to come. It's a journey, and we're only just getting started.

### Our journey to sustainability

At &Tradition, the entire design process is scrutinized from start to finish – How can we improve the materials here? Where is this wood sourced from? Which chemicals have been used on this fabric? How will this product be packaged? We pay attention every step of the way, and we are constantly researching, experimenting and testing new ways of sourcing, producing and manufacturing the designs you see today. For us, it's important to know where our materials come from, and how they have been treated. And we wish to be open about it.

Our collection makes use of a multitude of natural and man-made materials, ranging from woods, metals and plastics, to hides and feathers, to textiles and foams. It's a lot to think about – but for us, providing the highest quality products to our customers is paramount to who we are as a company. We work with natural materials such as walnut, which comes in a range of strong and rich hues and can easily be shaped into elaborate forms and polished to a smooth finishing; as well as marble and travertine, both highly resistant and durable; whilst organic materials are sourced for our home objects, ensuring longevity.

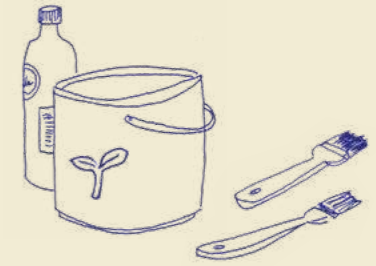

We are not your run-of-the-mill, one-time use design company – our collection is designed to be passed down through generations, to endure the impact of time, focusing on quality over quantity. 'Built to last' isn't just something we thought sounded great, it's the mantra that informs our decisions from start to finish. Being knowledgeable about where our materials are sourced from is important and we make sure to keep up-to-date with the latest findings and details.

### Materials that matter

Designs that endure through time cannot only rely on timeless looks, but must be built out of materials that last. At &Tradition, we devote much of our time and resources in sourcing the right materials for all of our furniture, accessory and lighting collections. 'Built to last' is a promise from us that we will do all we can to ensure that our collection is strong and sturdy enough to last for generations.

However, quality and sturdiness alone won't do the job. That's why we are allocating much of our resources in supporting a circular use of our materials; sourcing sustainable leathers and sheepskin, using Responsible Down Standard (RDS) feathers, eliminating all toxic chemicals, stepping up our recycling game, and improving our use of sustainably sourced FSC® certified wood, EU eco-label products and Oeko-Tex® certified materials.

And we still have much to improve, but we have set a number of concrete and achievable sustainability goals which we strive to accomplish in the nearest future.

### The process

Our journey towards sustainable design is an ongoing process, and by working with like-minded designers and artists we will do our utmost to ensure that our processes keep on progressing towards minimizing the environmental impact of our collection.

*Back Catalogue*

Chairs

From dining and lounge to counter and bar chairs the collection is available in a variety of different styles, colours and upholstery.
