Floor Lamps
by Sebastian Herkner

**BENT IS A
SCULPTURAL PIECE
WITH A UNIQUE
PRESENCE**

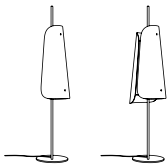

Presenting the beauty of glass through simple abstract forms, bent is a sculptural piece with a unique presence. A simple black steel frame allows its centrepiece to shine brightest; one or two curved sections of fluted and coloured glass. The simple pattern on the glass surfaces extends the light source to present a wave of form and light – illuminating even the darkest interiors.

A REFERENCE TO
TRADITIONAL JAPANESE
PAPER LANTERNS

Merging two spherical shapes into one handblown glass silhouette creates kumo’s unique form – referencing that of traditional Japanese paper lanterns. A strong limestone base in a matching tone supports the warm glow of the glass above; a balanced addition to your interior.

MAGMA PULLS THE ELEMENTS TOGETHER INTO ONE SCULPTURAL CENTREPIECE

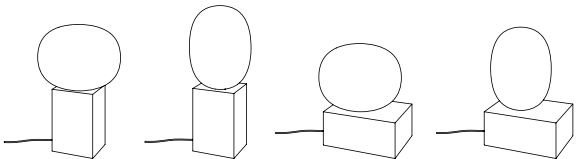

From its earthy base to floating illuminated top, magma pulls the elements together into one sculptural centrepiece. An oblong shaped handblown glass globe shines softly onto the strong, angular ceramic base below; whose fat lava glaze bubbles and streaks to reveal its own unique character.

stellar grape

Floor and Wall Lamps
by Sebastian Herkner

STELLAR PROVIDES A
DASH OF TEXTURE TO
YOUR INTERIOR

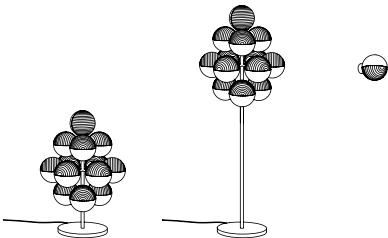

Raised up above the clouds on a simple black powder coated steel base, the stellar floor lamp will shine across your interior universe. A grouping of star-like spheres mixes frosted acetate illumination with a textured ripple. These handblown glass spheres offer the perfect mix of elegance and mystery for the rest of your interior to orbit.

stellar grape pendant

Pendant Lamps
by Sebastian Herkner

...AS IF A
CONSTELLATION OF
STARS HAS FALLEN
TO EARTH

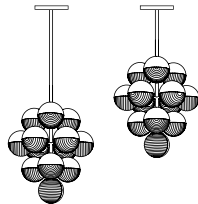

Adding to a growing galaxy of illumination, the stellar grape pendant lamp appears as if a constellation of stars has fallen to earth. A frosted acetate finish, delicately adding just the right glow to your interior; softens each textured blown glass globe. Brought together by a black powder coated steel frame, this suspended family will leave you star gazing.

bent dining table

Tables
by Sebastian Herkner

TRANSPARENCY,
TEXTURE
AND A SIMPLE
FORM

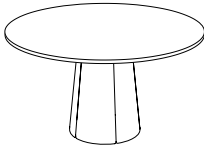

The bent table series transports the ephemeral qualities of glass into the humble table. Transparency, texture and a simple form are combined to provide a visually light but incredibly sturdy base. Designer Sebastian Herkner has adapted the simple cast glass forms of his bent lighting series into a set of striking tables. The same fluted and curved glass forms have been transported to produce solid structures that react and play with light and their environment. The result is a series of tables that command a closer look.

THE BEAUTY
OF GLASS IN ALL
ITS FORMS

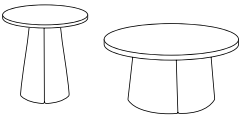

The bubbled surface of the cast glass table top dances against with the smooth lines of the fluted cast glass base. The bent side table expresses the beauty of glass in all its forms. With a striking simplicity, this interior companion has the ability to blend in or be the centre of attention.

Table Mirrors
by Studio Furthermore

LIKE A PIECE OF
MOONROCK...

The simple forms of the apollo mirror series help to place their unique materiality centre stage. Continuing Studio Furthermore's fascination with texture, experimental production methods and the unknown - the series plays with notions of hard and soft, heavy and an apparent weightlessness. Produced from foam cast aluminium, each piece exudes a unique coarseness across their bubbled surface. Like a piece of moon rock that has survived a journey through the atmosphere, each member of the apollo series is strikingly finished with a simple circular glass mirror.

...THE PERFECT
CENTRE POINT FOR
YOUR INTERIOR
GALAXY

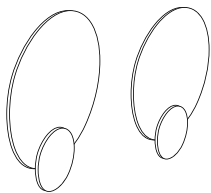

The apollo large wall mirror creates the perfect centre point for your interior galaxy. The long reflections of the striking circular glass mirror are accentuated by the rough foam cast aluminium fixing. Large enough to create their own gravitational pull, these two contrasting forms demand closer inspection.
