SKAGERAK
INDOOR LIVING

We live in a world where sustainability is quickly becoming the new normal. Fortunately, change is coming, and that is a good thing because we need to rethink the way we produce and consume. At Skagerak, we strive to act responsibly in everything we do. From the FSC™ certified wood, we use in a majority of our products, to the ten principles of the UN Global Compact Act that focuses on the rights and wellbeing of our employees and suppliers. We are also proud B Corp members, and seek to minimize waste, increase the demand for sustainable products and rethink the way we organize our business.

For more than 40 years we have been crafting long-lasting design pieces with a modern Nordic DNA, and our collection contains both classic furniture that has been with us for decades and new ones that have yet to write history. How we act and react in the world is essential, and to us, people and the planet always come first. We establish sustainable initiatives wherever we can, Reclassic being one of them. One man's outlived furniture is another man's treasure, which is why we take back vintage Skagerak furniture, restore them and send them back into circulation.

At Skagerak, we set the bar high to develop products made with sincere craftsmanship, environmental considerations and a universal aesthetic. We create furniture that is built to survive in the long run, so they patinate and accumulate stories. We strive to make furniture that makes it easy and launch sustainable concepts that can make it a reality.

This year, we present four new pieces in our Skagerak indoor collection: The brand new and already award-winning Vester Chair, the versatile Noboru stepladder, a new tall version of Jut Cabinet and two new sizes of the Aldus dining table – all crafted from the passion for the material, the production process and the fundamental idea that furniture is a long-lasting affair that should age with beauty.

Welcome to Skagerak
Jesper and Vibeke Panduro, Skagerak owners.

MAKING SENSE OF SUSTAINABLE CHOICES

Can we afford to continue business as usual? It might sound ironic, but to keep things the way they are – we have to change a lot.

The world population and global middle class are growing rapidly, and more people are moving to the cities. This will increase the demand for basic goods, housing, energy, heating and water. This wouldn't necessarily have to be a problem – if it wasn't for resources becoming scarce, a rising problem in inequality and climate change. The sum of these realities is, like it or not, that we will have to do way more with a lot less. More products, buildings and power – less pollution, CO²-emissions and extraction of virgin materials. Is that possible?

The short answer is yes. But we have to think smart, and adapt. We have to start considering environmental and social performances within society as equally important to economic growth and profit. In fact, these elements are each other's preconditions, not counterparts.

And then we have to stop our endless consumption and waste patterns – and see things for what they really are. For too many years have we thrown out useful and valuable materials. Time has come to stop this linear thinking and start putting stuff into circulation. To design things that can be repaired, reused, decomposed and regenerated.

What we do in Skagerak

In 2017, we joined the global B Corp movement – looking for new ways to use

our business as a force of good. B Corps are certified 'benefit corporations' meeting high standards of social and environmental performance, accountability and transparency.

For us to join B Corp the goal is not to compete to be the best in the world – but to help each other becoming the best FOR the world. And that is vital, for as a globally operating company, we have a great responsibility for today's development.

That's why we're striving to keep the utmost quality in three aspects: design, production and our relation to people and the planet.

An example of this is our initiative – Reclassic!

To Reclassic something is to pass on a valued item. When one family's cherished classics become a new family's Reclassics. From Skagerak Store in Copenhagen, we promote the buying and selling of used Skagerak furniture – some dating 20 years back. This way, we keep valuable material in circulation rather than seeing it being stored away or thrown out unnecessarily. That's good for society and even better for the environment.

You see, we've always designed things to last for generations. But how do we know they will? What happens when people change their surroundings and needs? When they leave their townhouse behind for a new island adventure, or have to move abroad for the job they've always wanted. In these cases, we make it easier to move on without leaving good things behind. To keep calm and Reclassic.

/ CEO Jesper Panduro

Royal Chair Reclassic
– still cherished 25 years later.

"TIME HAS COME TO STOP THIS LINEAR THINKING AND START PUTTING STUFF INTO CIRCULATION. TO DESIGN THINGS THAT CAN BE REPAIRED, REUSED, DECOMPOSED AND REGENERATED."

What has become an old classic for one person can become a Reclassic for someone else.

For Skagerak quality means everything. We approach quality as a three-stage process that begins with aesthetics, takes on substance in the choice and treatment of materials and becomes a sustainable unity when proper production processes and conditions are ensured. We are certified as both FSC and B Corp, which means that we honour the demands and principles of sustainable production and business management. We truly believe that quality is here to stay and that we can make positive changes together.

FSC-certified wood FSC is a global non-profit organisation that ensures responsible forestry. FSC means that the workers never fell more trees than the forest can reproduce and the biodiversity of the woods is preserved. FSC also means that the forestry workers are treated respectfully and have proper working conditions, just as FSC supports and cares for the local community. At Skagerak we are committed to expanding FSC-certified forests, so they can supply more FSC wood in the future. At this time it is still a challenge to ensure FSC teak, but we ambitiously pursue our goal of being 100% FSC-certified across all wood types by 2025.

Skagerak has been FSC-certified since 2003. Our certificate number is FSC™ C004462.

UN Global Compact As a member of UN Global Compact, Skagerak incorporates fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption. We incorporate the Ten Principles of the UN Global Compact in our strategies, policies and procedures because we believe it makes a difference, and because we want to uphold our basic responsibility to people and the planet. Every year we report our actions directly to the UN Global Compact.

Skagerak joined the UN Global Compact in 2011.

B Corp is another priority that we are particularly proud of. B Corp – Benefit Corporation – is about balancing purpose and profit and using business as a force for good. As a B Corp member we set the highest standards for social and environmental performance, accountability and transparency and strive to incorporate these ambitions into our everyday business practices.

Skagerak was certified as a B Corp business in 2017.

Reclassic At Skagerak we are dedicated to the products we create and to ensuring their long lifespan. That is why we have invented Reclassic. Reclassic is another way that we enter the orbit of maintenance and sustainability. Skagerak lets you return your old furniture in exchange for a new purchase. Reclassic is our take-back guarantee as a further incentive for you to care for your Skagerak furniture and protect the environment. When you buy a new piece of furniture, you can sell it back to us years later, provided it has been well maintained, and the Reclassic piece will get a new life in a new home.

Reclassic was initiated in 2017.

Five Year Warranty At Skagerak, long-lasting design means long-lasting life. Our outdoor furniture is built to last, and it lasts longer and better when it is maintained properly. We offer expert guidance on the best care and maintenance of Skagerak furniture, so you can keep your furniture looking beautiful for many years to come.

We have a five-year guarantee on our products.

INDOOR COLLECTION

MATERIALS/ INDOOR

Skagerak uses quality wood. Wood that will stand the test of time and is produced under responsible terms and conditions. We mostly use FSC-certified wood, and we work as ambassadors to help increase the number of certified woods to meet the demand. We are increasing the share of FSC wood in our products every day in pursuit of our ambitious goal of being 100% FSC-certified across all wood types by 2025.

Did you know that the CO² contained by FSC wood remains in the timber, even after it has been turned into furniture and is not released into the atmosphere until it is scrapped? This means that if you keep your furniture for 50 years, the CO² is contained within the material the entire time.

Oak is a sturdy and hardwearing type of wood containing natural tannins that will protect against bacterial growth. The Skagerak oak comes from European forests and is either 100% FSC™-certified or FSC™-mix certified, supporting sustainable forest management. Several of our furniture produced in oak can be ordered in treatments that suit your needs. The treatments available are white soap, white oil or natural oil which all protect and strengthen the wooden surface.

Teak is a heavy, hard and sturdy type of wood. The high content of natural oils makes it highly resistant – perfect for functional everyday items in your home such as household articles and furniture. Our 100% FSC™-certified Teak comes from Central America, Brazil and Indonesia, while the rest of our Teak comes from plantations in Southeast Asia and Trinidad; managed to sustain a renewable and reliable supply of wood.

Leather is a strong and natural material that gets a beautiful patina over time. We use different types of leather – grain leather when we need the strong durability of the leather and aniline leather for a softer but still natural appearance.

Wool Several of our indoor cushions are made in wool. We have chosen to work with wool because it is a natural material that gives a sublime comfort due to its softness and ability to absorb/give off humidity. Moreover wool is naturally dirt resistant. We use Kvadrat and Gabriel fabrics for our indoor cushions.

Brass is an alloy of copper and zinc, popular for its superb malleability, hardness, corrosion resistance and attractive appearance. Brass will tarnish over time, but with a little care, the surface can be cleaned with brass polish and shine again.

Terracotta is a beautiful looking type of earthenware. All our terracotta products are produced in Portugal where the terracotta is naturally occurring. Our tableware collection is high-fired to give a more sturdy product.
