AUTUMN / WINTER 2025

Timeles design since 1960

Our Autumn / Winter 2025 collection is a celebration of timeless design crafted by our iconic designers since 1960.

Each item is a continuation of our design heritage, that will continue to be passed on through generations. Thoughtfully created to enhance daily life with beauty and functionality.

Welcome to a collection where timeless design and calm elegance come together to make every moment a little more beautiful.

PILASTRO BY FRANCIS CAYOUE

The Pilastro series, designed by Francis Cayouette, reflect a deep understanding of everyday life. Inspired by the Art Deco movement, the collection features fluted details that combine classic design with modern versatility.

Francis Cayouette is a Canadian designer based in Copenhagen since 1999, where he runs his studio Unit10. Educated in Montreal and Paris, he collaborates with both Scandinavian and international brands to create thoughtful, functional products.

The Pilastro series, designed by Francis Cayouette, reflect a deep understanding of everyday life. Inspired by the Art Deco movement, the collection features fluted details that combine classic design with modern versatility.

Making everyday life a bit more beautiful

New Pilastro ovenproof dishes in ribbed glass with a minimalist and timeless design. Perfect for baking and serving—straight from oven to table. The heat-resistant glass combines function and aesthetics, adding a refined touch to any table setting.

Francis Cayouette's designs masterfully balance form and function—transforming everyday life into something special.

The new elegant and practical storage jar in ribbed glass adds a refined touch to any kitchen. Ideal for spices, nuts, tea, coffee or other dry goods, and the airtight seal preserves both freshness and aroma.

The simple, beautiful glass products in the Pilastro series—drinking glasses in three sizes, long drink glasses, a wine cooler, carafe, cocktail shaker, serving bowls, tapas set, and ovenproof dishes—already adorn many homes. Now, the series is expanding to include wine glasses, storage jars, and two sizes of ovenproof pie dishes.

Despite its elegant appearance, the entire Pilastro series is extremely durable and robust, allowing it to withstand everyday handling and frequent dishwasher use with ease.

EM77 BY ERIK MAGNUSSEN

The EM77 series, designed by Erik Magnussen, reflects a deep understanding of form and function. This versatile collection features Danish design icons—where form pleases the eye and function refines the taste.

Perfecting form and function

Erik Magnussen was one of Denmark's most celebrated industrial designers, known for his functional, elegant, and forward-thinking creations. Trained as a ceramist, he went on to design everything from furniture and lighting to iconic tableware.

His long-standing collaboration with Stelton resulted in timeless pieces that remain design classics. Magnussen's legacy lives on through award-winning works that continue to shape modern design.

The EM77 series, designed by Erik Magnussen, reflects a deep understanding of form and function. This versatile collection features Danish design icons—where form pleases the eye and function refines the taste.

Pure, smooth and refreshing

Experience the benefits of clean, soft and better-tasting water with the EM77 water filter jug and Stelton Magnesium+ water filter.

Filtering water protects appliances like kettles and coffee machines, ensuring optimal performance and a longer lifespan.

For the moments that matter

The EM77 water filter jug and Stelton Magnesium+ water filter reduce impurities and enrich the water with magnesium—enhancing the flavor of your water, coffee, tea, and other beverages.

Designed to last a lifetime

„My way of designing is not an intellectual process. My ideas are borne out of my own needs. I don't want to complicate things, only to make everyday life a little easier.“

- Erik Magnussen, Designer

The EM77 vacuum jug was designed to last a lifetime, as all the components can be replaced if they should break. This extends the service life of the vacuum jug, thereby benefiting the environment.

Made in Denmark

The EM77 vacuum jug is a renowned design icon. Exhibited in museums globally, this iconic jug, crafted from ABS plastic, has been produced in Denmark since 1977, available in an extensive palette of over 100 colors.

Inspired by the iconic EM77 vacuum jug design, the EM tray and jug with lid epitomize stylish serving in the Stelton EM series. Crafted in Denmark, they seamlessly blend form and function with timeless elegance.

Inspired by materials like cashmere and wool, the AW2025 colors pay tribute to understated Nordic luxury.

As autumn settles in and we begin to spend more time indoors, the home becomes a natural focus—a space for calm, warmth, and thoughtful moments. Stelton's classic EM77 vacuum jugs are introduced in three refined new shades, inspired by soft textiles and honest, tactile materials: Dark Forest, a deep, elegant green reminiscent of the forest at dusk; Heather, a delicate blush tone, warm and powdery like cashmere; and Sand, a soft, natural shade with the soothing warmth of wool. A quiet statement for homes that embrace the season with softness and style.

Shades of the season

Dark Forest—a deep, elegant green
reminiscent of the forest at dusk.

Heather—a delicate blush tone,
warm and powdery like cashmere.

Sand—a soft, natural
shade with the soothing
warmth of wool.

Inspired by materials like cashmere and wool, this season's new colors pay tribute to understated Nordic luxury. As autumn settles in and we begin to spend more time indoors, the home becomes a natural focus—a space for calm, warmth, and thoughtful moments. A quiet statement for homes that embrace the season with softness.

DESIGN BY SØREN REFSGAARD

The minimalist design of both the Pier lamp and Brus carbonator that combines form and function are typical examples of designer Søren Refsgaard's desire to cut away all that is superfluous.

Simplicity at its best

Søren Refsgaard is a Copenhagen-based designer whose work is rooted in the Danish design tradition. Since founding his studio in 2003, he has created lighting, furniture, and home accessories characterized by clean lines and functional clarity.

Refsgaard strives to find the delicate balance between simplicity and character—removing the unnecessary without losing the soul of the design.

The minimalist design of both the Pier lamp and Brus that combines form and function are typical examples of designer Søren Refsgaard's desire to cut away all that is superfluous.

„I am naturally driven by a desire to create products that are simple in both function and design. For me, there is a fine line between something being simple or banal. This is the balance that I investigate for every product I create. How much can I cut away without the design losing its character or soul?“

- Søren Refsgaard, Designer

CYLLINDA-LINE BY ARNE JACOBSEN

Arne Jacobsen's vision for Cyllinda-line was that the series should enrich the ordinary consumer with good industrial design. With his design, he realized some of the most important ideas from functionalism—total proportionality between form and function.

Design icons

Arne Jacobsen is one of the most recognised Danish architects worldwide. Uncompromising in his approach, Jacobsen went beyond architecture to design furniture, lighting and interiors.

Arne Jacobsen played an important role in modernism and Danish design history, and present-day designers are still highly influenced by his works. He had an extraordinary understanding of proportion, which he applied to his designs.

Arne Jacobsen designed the award-winning Cylinda-line series for Stelton in 1967 and it remains the heart of Stelton's design DNA.

The story behind a design Icon.

When Stelton set out to create a vacuum jug to complement Cylinda-line—Erik Magnussen was entrusted with the task. The result was the EM77: a vacuum jug that echoes the Cylinda-line's signature cylindrical form and minimalist expression, uniting functionality with timeless design.

The minimalist design of Brus that combines form and function speaks to the Scandinavian design tradition and is a typical example of designer Søren Refsgaard's desire to cut away all that is superfluous. The design draws on the cylindrical shapes that are classic to Stelton designs.

ORIGINAL BY PETER HOLMBLAD

The Original series, by Peter Holmblad, stands as a tribute to Stelton's design DNA. Holmblad's vision, shaped through his close collaboration with Arne Jacobsen, marked the beginning of a new era for Stelton.

Combining functionality with aesthetics has been key to Stelton's success and its enduring influence in the design world.

Peter Holmblad played an important role in shaping Stelton as a design brand.

Holmblad designed several iconic products, including the Original series. His vision and collaboration with Arne Jacobsen led to the legendary Cylinda-line—marking a new era for Stelton.

The Original flower watering can is part of the Original-series which is a central part of Stelton's design DNA. With its elegant idiom, functionality meets aesthetics and in addition to its original function: keeping flowers and green plants fresh, it is also a decorative sculpture when not in use.

Designed to last

The EM ship's LED lamp designed by Erik Magnussen is crafted in satin-polished stainless steel, and its minimalist and cylindrical form is preserved to ensure a timeless aesthetic. The classic EM Ship's lamp is still available with a traditional burner.

Making every moment special

Sebastian Holmbäck and Ulrik Nordentoft met at the Danish Design School, where they both trained. Almost 10 years after their graduation they established the HolmbäckNordentoft studio. Their common ground, and the basis for all their work, is aesthetics. The studio works in a wide range of design areas, including interior design, furniture, lighting, industrial design and product design, which is their primary focus.

The Emma series, with its simple and elegant lines, is a beautiful addition to any kitchen counter or table. This combination of stainless steel with details of moulded beech wood fits perfectly into a modern home. In the Emma collection, you will find everything you need to set an inviting table from cups and plates to vacuum jugs, electric kettles and French press.

Timeless elegance

The Amphora vacuum jug in stainless steel is dishwasher safe and will keep your coffee or tea hot for hours. The vacuum jug is named after the ancient Greek earthenware pots which were used to store and transport oil and wine. The Danish designer, Sebastian Holmbäck has drawn inspiration from the amphora's round body and distinctive shoulders in a design that also reaches far into the future.

The Ro Qi wireless charger is a beautiful combination of functionality and aesthetics. Crafted from certified oak, the charger is not only a practical tool but a simple and elegant solution for the modern home.

With space to charge two devices wirelessly and two more via cable, the wireless charger ensures that all the devices can be charged easily and efficiently. Simply place your Qi-compatible device on the charging pad, and the battery will be charged without the need for cables.

An eco-conscious lifestyle

Stelton offers high quality vacuum insulated cups and bottles in 90% recycled stainless steel. Perfect for those who aspire to maintain an elegant and environmentally friendly lifestyle while on the go.

Stelton x Moomin

2025 marks 80 years of Moomin stories – The central theme of the anniversary year is the Moominhouse and what it stands for – a sense of belonging, a place where the door is always open. Every character is welcomed as they are and accepted for who they are. The Moomin stories are universal and timeless tales about belonging and inclusion.

In 2025, we will celebrate these wonderful stories with special 80th anniversary editions of To Go Click, where the Moomin 80 anniversary logo has been integrated into the graphics.
