

zanotta:

CONTRACT REFERENCES

Zanotta in the public space

The valuable materials, the refinement of finishes, the comfort, duration and safety are some of the distinctive features of Zanotta products, and thanks to the accuracy in design they are fit to be used for any applications where the capability to withstand an intense and severe use is required, in addition to aesthetic values.

Being present in more than sixty countries worldwide has allowed Zanotta to acquire a well established know-how in the international standardization. Zanotta is also member of UNI (Italian national association for standardization) and CEN (European standardization committee). This important know-how in the field of standardization is the best guarantee of the highest quality and performance levels achieved by the Zanotta products.

Zanotta's offer for the Contract market foresees to use both products of its own catalogue (in their standard configuration or customized according to the design specifications) and to produce tailor-made furnishing solutions; for these latter Zanotta put its own research and engineering structure at disposal for further development.
