adjustable light

Pallino: dynamic attitude.

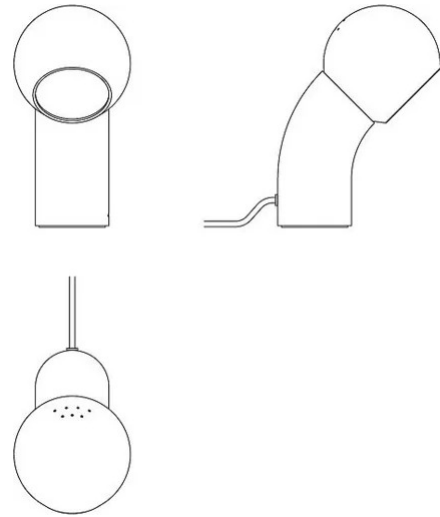

The adjustable spherical reflector is the heart of the design: a small luminous orbit that allows the beam (and the gaze) to be directed with precision.

The light follows and accompanies. On the desk, it becomes a precise tool for concentration; next to the bed, it transforms into an intimate presence, marking the time of rest and awakening, enveloping you in a warm light that evokes an era when the future seemed a place full of colour and joy.

The slightly curved cylindrical base supports and slants the sphere, giving it momentum and personality.
