*Introducing Admiral Portable Lamp
– a design where light becomes part of the setting
rather than the focal point of it.*

Audo introduces Admiral Portable Lamp by Pernille Arlien-Søborg, a lighting design developed from the experience of hospitality and the atmosphere created around shared tables.

Originally conceived for Copenhagen's Admiral Hotel, the lamp began with a simple intention: to create light that supports the sensory experience of dining. Not only illumination itself, but the feeling surrounding it. The reflection of glassware, the warmth across a surface, the shift in atmosphere that happens as daylight fades and conversation settles into the evening.

That thinking shaped every part of the design. Offset by an injection moulded ABS base with a chrome finish, the sculpted linen shade diffuses the light into a soft, concentrated glow, while the compact proportions allow the lamp to sit naturally within intimate settings without interrupting the space around it. Used individually, it creates a focused atmosphere around a table. Repeated across larger restaurant interiors, it introduces rhythm and warmth through small clusters of light.

Compatible with the Audo Charging Board, a rechargeable battery offers extended use, while the warm 2700K LED bulb enhances depth within the surrounding space. Admiral is constructed for disassembly, allowing components to be repaired or recycled over time.

About the Designer

Pernille Arlien-Søborg is a Copenhagen-based designer whose work is shaped by a deep sensitivity to atmosphere, materiality and the sensory experience of space. Educated in Spatial Design at the Royal Danish Academy, she founded her studio in 2008, specialising in hospitality interiors across restaurants, hotels and workspaces.

Her approach begins with the identity of a place and the feeling it should evoke. Working across light, materials, sound and texture, she engages the senses in subtle and carefully considered ways. Rather than treating interiors as static compositions, Pernille views them as settings for experience and interaction, where mood and rhythm are shaped through the relationship between objects, surfaces and people.

For Audo, she has designed the Admiral Portable Lamp, originally developed for Admiral Hotel in Copenhagen to create a softer, more intimate light around the dining table.

PRODUCT TYPE
Table lamp
