

Bit stool

A multifunctional design
that is a bit more resourceful

normann
COPENHAGEN

Every Bit is a bit unique

Bit is an aesthetically pleasing, versatile stool with countless possibilities for your home. Use Bit as a pedestal for a floral arrangement, as a side table for a lamp, or as impromptu seating for that unexpected dinner guest. Inspired by clear-cut shapes such as monoliths and columns, designer Simon Legald's take on the stool is both bold and multifunctional. The straightforward, utilitarian look contrasts with the pixelated surface made up of small bits of 100% recycled household and industrial plastic. A particular process, where plastic fragments are heated to a 120°C melting point, makes it possible to repeatedly reuse and reheat the material without altering its properties. The result is a stool design with a distinctive thickness and composition, making every Bit a bit unique.
